

First thing to check is (dimple.gif), if you look under the sink at the first metal plate above the hopper you will see a "u" shaped cut out, this should line up exactly with a dimple in the sink bush.

Next, (Slot.gif) you should be able to see that the 3 bolts holding the hopper to the sink bush assembly are all the way into the slots. You may have to take a nut and washer off to see clearly

Finally, (alignment.gif) The word "Maxmatic" should be directly above the control box. The photo is taken without a sink.
